Applicants thank the Examiner for forwarding the PTO Draftsperson’s approval of Formal Drawings.

Specification

Applicants have amended the first paragraph of the specification to correct the priority chain in the pending application. Additionally, in order to overcome the Examiner’s objection to the title, Applicants have amended the title of the invention to more clearly indicated the subject matter of the claimed invention.

Examiner’s Rejection of Claims 1-2

The Examiner rejected claims 1-2 under 35 U.S.C. § 112, second paragraph, as allegedly being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as their invention. The Examiner also rejected claims 1-2 under 35 U.S.C. § 103 as allegedly being unpatentable over Good *et al.*, “Structure-Activity Relationships from Molecular Similarity Matrices”, Journal of Medicinal Chemistry, Vol. 36(4), pp. 433-438 (February 1993), in view of Herndon, “Similarity and Dissimilarity of Molecular Structures,” reported in Warr, “Exploiting Molecular Diversity,” pp. 23-25 (February 1995), and further in view of Egger *et al.*, U.S. Patent 5,832,494 which was filed May 17, 1996 and issued on November 3, 1998.

By way of this Amendment, Applicants have cancelled claims 1-2 without prejudice or disclaimer to the subject matter therein. Upon entry of the foregoing amendments, new claims 3-

23 are currently pending in the Application. Applicants assert that this Amendment has rendered moot the Examiner's rejections to claims 1-2, outlined above. The amendment does not, however, constitute an admission regarding the patentability of the amended subject matter and should not be so construed.
